SKILLS

Technical Skills

- Python
- JavaScript
- TypeScript
- React
- Node.js
- C++
- Git & GitHub
- SQL / MySQL
- Agile

Soft Skills

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Teamwork

LANGUAGES

Romanian — Native

English — Advanced (C1)

CERTIFICATES

Cambridge English: Advanced (C1)

Web Programming 101 & 102

SUMMARY

Engineering student interested in **software development**, **quality assurance** and **test automation**. Hands-on experience with **Python**, **Git** and **full-stack web development** through academic and personal projects. Eager to contribute to building reliable software.

PROFESSIONAL EXPERIENCE

Vodafone Intelligent Solutions (VOIS)

Summer School of Engineering Participant

07/2026 – 08/2026 | Bucharest, Romania

- Completed hands-on workshops covering **Python**, **Cloud Development**, **DevOps**, **Agile**, **Quality Assurance** and **Design & Architecture**.
- Applied software engineering principles using **Git** and **Python** through collaborative technical exercises and team-based activities.
- Collaborated with industry mentors while strengthening analytical thinking, problem-solving and teamwork skills.

EDUCATION

B.Sc. in Electronics, Telecommunications and Information Technology

POLITEHNICA Bucharest

2024 – 2028 | Bucharest, Romania

- Relevant coursework: Object-Oriented Programming, Database Systems, Data Structures, Algorithms.

PROJECTS

Automotive Service Management System [🔗](#)

React, TypeScript, Node.js, Express, MySQL

- Developed a full-stack application that manages customer, vehicle, inventory and invoice data for an automotive service.
- Designed and integrated a relational MySQL database with role-based access for managers and clients.
- Implemented CRUD operations through a React frontend and Node.js backend.

Personal Portfolio Website [🔗](#)

React, TypeScript, Vite

- Developed a responsive portfolio website using React and TypeScript.
- Designed reusable UI components and multiple layouts.
- Integrated project showcases, GitHub repositories and downloadable CV.

QR Code Generator & Scanner [🔗](#)

Python, Tkinter, OpenCV

- Developed a desktop application for generating and scanning QR codes from images and a live webcam feed.
- Designed a modular Python architecture with QR processing, session history and email sharing.
