andreibarbuceanu

Skills

Programming: Python, JavaScript, TypeScript, SQL, C++

AI & Automation: Gemini API, Prompt Engineering, AI Agents, Workflow Automation

Web & Backend: React, React Native, Node.js, Express.js, FastAPI, REST APIs

Testing & Databases: Playwright, Jest, React Testing Library, MySQL, SQLite, Firebase

Engineering & Tools: Git, GitHub, Agile, Root-Cause Analysis, Rapid Prototyping

Certificates

VOIS Summer School of Engineering — VOIS, 2026

Web Programming 101 & 102 — Cisco Networking Academy, 2025–2026

Cambridge English: First (FCE), Grade A (C1) — 2023

Summary

Detail-oriented individual with hands-on experience in software projects and collaborative development. Interested in creating practical solutions, contributing to meaningful projects, and continuously expanding technical knowledge.

Education

B.Sc. in Applied Electronics
POLITEHNICA Bucharest — Faculty of Electronics, Telecommunications and Information Technology (ETTI)
2024 – 2028 (Expected)
Relevant Coursework: Object-Oriented Programming, Data Structures, Database Systems, Microcontrollers.

Professional Experience

Vodafone Intelligent Solutions (VOIS)
Summer School of Engineering Participant | Jul – Aug 2026

- Completed hands-on technical workshops covering Python, Frontend Development, AI, Cloud, DevOps, Software Architecture, QA, and Cybersecurity.
- Collaborated in a four-person Agile team, contributing to application development, testing, and presenting the final project to industry mentors.

Projects

AfterCheck — AI-Powered Post-Release Verification
ITFest x Innovation Labs Hackathon | Python, FastAPI, Gemini API, Playwright, React

- Co-developed an AI-assisted QA tool combining automated browser testing with customer feedback analysis to verify software fixes.
- Contributed to a post-release dashboard classifying issues as resolved, unresolved, or requiring further monitoring.

QR Code Generator & Scanner
Python, Tkinter, OpenCV

- Developed a modular Python application for generating and scanning QR codes from images and live webcam input.
- Implemented a graphical interface featuring QR previews, session history, and email sharing.

SetItUp — Collaborative Mobile Application
React Native, TypeScript, Expo, Firebase, Jest

- Co-developed a cross-platform mobile application featuring authentication, user profiles, friend management, and real-time messaging.
- Contributed to Firebase integration, reusable components, and automated testing within a four-person Agile team.
